

Sycomore AM has completed the SRI-certification of its entire Long-Only Equity fund range

Dear clients,

Earlier this year, we publicly announced that we would apply for the French government-backed **SRI label** for all of our **7 Long-Only equity funds**, thereby emphasising our status as a key player in the responsible investment space.

The process is now complete. After a **thorough certification procedure** conducted by Ernst & Young, the last 3 funds of the range - **Sycomore Sélection PME**, **Sycomore Francecap** and **Sycomore Sélection Midcap** - have just received their labels.

We are very happy with this outcome, which demonstrates the **consistency of our investment policy** and confirms the commitments we have made in the area of socially responsible investments. Launched in 2016 by the French Ministry of Finance, the SRI label has become the key benchmark in France for promoting sustainable and responsible finance, as well as a **guarantee of investment process quality**. We fully adhere to these goals of transparency and are delighted to work by your side as a responsible investor, **helping you deliver performance and create positive contribution**.

9 certified funds
